

Model 2100

Improved productivity for incoming mail

Improve mail opening with milling technology

Fast and efficient, the Model 2100 letter opener processes up to 400 envelopes per minute. The unit quickly and effortlessly opens envelopes, allowing quick extraction of contents. It eliminates the productivity delays that can be caused by only partially opening an envelope.

Improve productivity

Fitting comfortably on a table top, the Model 2100 is ideal for mixed sizes of mail, including C4 as well as oversized and thicker than normal envelopes. It opens envelopes containing folded documents without cutting the contents. An integrated waste bin allows the removal of waste without disruption.

Durable and reliable, the model 2100 is made of steel with the highest quality components and workmanship assuring minimal operating costs.

Protect envelope contents and minimise waste

Using unique milling technology, the Model 2100 removes small chips from the envelope edge. This means that there is minimal risk of damage to the envelope contents. Unnecessary waste is eliminated because the Model 2100 produces tiny milled chips rather than larger strip cuttings. The presentation of a soft feathered edge helps avoid painful paper cuts that can arise should sharp edges be presented.

Monitor volumes

The Model 2100 has a digital counter that allows you to monitor incoming mail volumes. The unit can also be set to count rather than open allowing you to use the unit to monitor incoming volumes without the need for every mailpiece to be opened.

Specifications

Length:	102cm
Depth:	39cm
Height:	36cm
Weight:	28kg
Power:	220-240VA, 50Hz, 3 amps
Speed:	400 envelopes per minute
Envelopes Supported:	All main envelope sizes
Thickness:	Up to 4.8mm
Depth of Cut:	0.25-2.5mm
Feeder Hopper Capacity:	76mm
Stacker Capacity:	Included

The unique milling cutter produces a soft, feathered edge.
