

Model 206

Improved productivity for high volumes of incoming mail

Improve productivity when dealing with incoming mail

High speed, high volume letter opening

The Model 206 letter opener features mixed mail feeding and handling with minimal operator intervention, sorting or jogging. It can handle mixed mail without the need for pre-sorting. Its processing speeds of up to 36,000 envelopes per hour will enhance the productivity of your inbound mail operation.

Designed with the operator in mind

Advanced technology is enhanced by an ergonomic workflow for greater levels of operator comfort, convenience and productivity. The Model 206 is so simple to use that even inexperienced operators can easily achieve full process speeds with little effort.

Two mail tray supports allow mail to be presented ready for feeding and then collated for onward process without disruption to the operator.

Unique milling technology

The innovative high speed milling cutter removes tiny chips from the envelope edge for safe and secure extraction – preventing sliced contents and paper cuts by producing a soft, feathered edge. Milled chips are collected and discarded through a tube, reducing static build up.

For added safety and convenience a four position, operator adjustable depth of cut is available, allowing you to adjust your setting to the profile of mail.

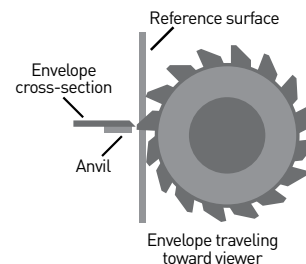

Monitor productivity levels

The optional batch counter function allows you to set pre-selected batch levels. This ensures that once a set number of envelopes are opened the machine will stop after the batch level is reached. This allows the operator to set process levels at a manageable level for onward process.

Automatic jam detection allows for easy machine clearing without disruption to productivity levels, should a blockage occur.

Specifications

Length:	1194mm
Depth:	572mm
Height:	1448mm
Weight:	110kg
Power:	220-240 VAC, 50Hz, 3 amps
Speed:	Up to 36,000 per hour
Envelopes Supported:	All main envelope types
Thickness:	Up to 10mm
Depth of Cut:	From no cut to 3mm
Feeder Hopper Capacity:	Up to 400 envelopes

The unique milling cutter produces a soft, feathered edge.
